Journalist	09/09/2020	1. A briefing note for the HSE CCO by the National Cancer Control Programme, dated 20 April 2020	Admin Access	07/10/2020
Individual	04/09/2020	I would like to request figures from the National Screening Service on the number of people that have been screened through the State's three cancer screening programmes in a named county from the start of this year to September 4, 2020 and the numbers screened in this county in 2019. I would like these figures to be broken down month by month for comparison. I would also like this broken down into figures for each of the programmes - Breast Check, Cervical Check and Bowel Screen and where in this county the screening took place	Granted in Part	02/10/2020
Journalist	10/09/2020	I would like information on how many people are on the waiting list for first assessment for speech and language therapy.	Granted	08/10/2020
Individual	10/09/2020	1) Reference the report Underlying conditions in confirmed cases of COVID-19 in Ireland 31/08/20 issued by HPSC: a) Please provide the total deaths for each of the categories to Table 1: Underlying medical conditions in confirmed cases of COVID-19 with data available up to midnight 29/08/2020 b) For each of the categories in Table 1, please provide the number of cases and deaths by age group.	Granted	06/10/2020
Individual	10/09/2020	Reference the report of the profile of COVID-19 cases in healthcare workers in Ireland published by HPSC on 24/08/2020 a) Please provide the data series used to prepare the chart in Figure 3 Distribution of HCW COVID-19 cases by ages and sex b) Please provide the breakdown of Health Care Worker deaths by sex and age group	Granted in Part	06/10/2020
Individual	10/09/2020	1. Reference the report Epidemiology of Covid-19 in Ireland prepared by HPSC on 2/9/20. a. Please provide the data series used to prepare the chart in fig. 1b: Number & cumulative number of confirmed Covid-19 cases notified in Ireland by edipemiological date ** to midnight 31/08/20 b. Please provide the data series used to prepare the chart in figure 6a: Daily & 7 day moving average of deaths among Covid-19 cases notified in Ireland by date of death and cumulative total to midnight 31/08/20	Granted	06/10/2020

Individual	10/09/2020	<p>1. Reference the statement from the NPHEM Monday 7th September and 2. The Statement from the NPHEM Wednesday 24th June.</p> <p>3. The estimate of recoveries has not been updated since the 24th June statement which included the estimate for 21 June. Most countries update this estimate several times a week if not daily.</p> <p>4. There are three possible reasons the estimate of recoveries has not been updated:</p> <p>a. There have been no more recoveries and the number of active cases is 29,774 confirmed - 1,777 deaths - 23,364 recovered = 4,633. If so please confirm.</p> <p>b. Estimates of recoveries have continued to be made but have not been made public. If so please provide a copy of the current estimate as of your response date and each of the prior estimates since 24 June.</p> <p>c. There have been no new estimates of recoveries since 21 June. if so please confirm and provide a copy of the minutes of the meeting at which it was decided not to prepare anymore estimates of recoveries.</p>	Refused	06/10/2020
Individual	10/09/2020	<p>1. Reference the datafile Covid19 AcuteHospitalHistoricSummaryOpenData available for download on the Covid 19 Ireland Data Hub, the data appears to be inaccurate:</p> <p>a. The sum of admissions from the first record on 2020/04/03 to 2020/09/03 is 1,580. The number in hospital on 2020/09/03 is given as 40. These values indicate the total number of discharges in the period should be $704 + 1,580 - 40 = 2,244$. However, the sum of Discharges for the period is 2,314. Therefore, there are inaccuracies in the data.</p> <p>b. On the 2020/04/05 the HPSC Epidemiology reports state a total of 1,203 had been hospitalised by 2020/04/03. Adding the sum total of admissions up to 2020/09/01, i.e. 1,577, results in a total of 2,780 admissions to date. The HPSC epidemiological report for 2020/09/01 states the total hospitalisation is 3,415. One of these values is wildly inaccurate.</p> <p>c. The number of deaths each day in hospital is not given. Nevertheless if the data provided were accurate, it should be possible to calculate it from the data since the daily increase in Hospitalisation = Admissions - Discharges - Deaths. Therefore, the daily deaths in hospitals should be calculable from the available data using the formula $Deaths = Daily\ increase\ in\ Hospitalisation - Admissions + Discharges$. Attempting this calculation with the data provided many negative value results, an impossible result, therefore the data is inaccurate data.</p> <p>d. Please correct and provide verified accurate data.</p>	Refused	06/10/2020
Individual	11/09/2020	<ul style="list-style-type: none"> • All email correspondence, as well of minutes of all meetings, from or to HSE chief strategy and planning officer concerning Community Hospital Ireland • Copies of any reports/submissions/memos or other such review documents prepared for or by the HSE chief strategy and planning officer on Community Hospital Ireland 	Refused	07/10/2020
