Business/Special Interest	09/10/2023	<p>Please provide us with a full, accurate and complete list of records held by the Department of Health on behalf of the Government of Ireland which describe the isolation of the SARS-COV-2 virus (Coronavirus COVID-19), taken directly from a symptomatic patient with COVID-19, where the sample was not combined or mixed with any other source of genetic material (such as, for example, monkey kidney cells or cancer cells), thereby eliminating contamination as a possible source of sampling.</p> <p>Q1: When was the first Irish patient diagnosed and isolated with SARS-COV-2 and what region of the country do they reside?</p> <p>Q2: Where and when was the first recorded death from SARS-COV-2 recorded in Ireland. Was there an autopsy performed by a pathologist which consisted of a thorough examination of the corpse by dissection to determine the cause, mode and manner of death?</p> <p>Q3: Was the virus from the infected individual isolated from nasopharyngeal and oropharyngeal specimens, and what characterised the viral sequence and replication properties, and cell culture tropism. Was the virus photographed and is there a copy of the findings?</p> <p>Q4: Was the specimen deposited into two virus repositories, making it broadly available to the public health and research communities within Ireland and the EU?</p> <p>Please note that the word "isolation" is used here in the normally understood meaning of that word, namely, the act of separating one thing from another. We are not referring to (and hence not requesting) documents where "isolation" means the preparation of a culture for something else, the performance of an amplification test (e.g. a PCR which detects only mRNA or DNA), or to the sequencing of anything other than the viral isolate in question above. If any records of the Department of Health match the above description, please provide information so that we may identify and access each record with certainty. Please provide also the title, author, date, journal, web-link etc. of any document, online or otherwise, recorded in a document held by the Department of Health or under its authority, which describes the isolation procedure in relation to the four questions above.</p>	Granted in Part
