GT4 Cirrhotic	12 weeks (Treatment naïve)	12 weeks	12 weeks	12 weeks (CAG Approval Required)
GT5/6 Non Cirrhotic	12 weeks (Treatment naïve)	12 weeks	8 weeks	12 weeks (CAG Approval Required)
GT5/6 Cirrhotic	12 weeks (Treatment naïve)	12 weeks	12 weeks	12 weeks (CAG Approval Required)

The NHCTP Treatment Guidelines outline that Clinical Lead approval is automatically granted for patients fulfilling the below criteria and suitable for 8 week treatment with Maviret (tick one). No additional paperwork required by PCRS.

- 8 week treatment required for Patient receiving treatment in Prison setting
- 8 week treatment required for Patient with a chaotic or disorganised lifestyle who has difficulty attending clinic or complying with treatment as a result of on-going psychiatric or substance abuse challenges

I wish to apply for individual funding of reimbursement of the specified first line regimen for the above patient. I confirm that the information provided in this form is correct.
