Date Sent				

Signed (Potential Sample taker): _____ Date: _____

Name (Block Capitals): _____

Parents/Legal Guardians may change their mind and 'opt back in' to have their baby screened, until their baby reaches one year of age, but it is their responsibility to inform their GP or Public Health Nurse. The Cystic Fibrosis 'heel prick' screen is not suitable if a baby is over six weeks of age and a different test is necessary, separate to the heel prick, for this component of the screening programme.
