20th April 2022

Deputy Joe O'Brien,
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

PQ 20936/22 – To ask the Minister for Health the status of the development of dedicated clinics and models of care for patients with long-Covid; and if he will make a statement on the matter.

- Joe O'Brien

Dear Deputy O'Brien,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Questions (PQ 20936/22), which you submitted to the Minister for Health for response.

The HSE Interim Model of Care (MoC) for Long COVID was published in September 2021. The aim of the MoC is to provide a national approach to provision of services and supports for patients experiencing prolonged symptoms of COVID-19. It sets out a framework for the provision of these services and supports spanning General Practice, Community Services, Acute Hospitals and Mental Health Services. The resultant interim Model of Care recommended the development of eight Post-Acute clinics and six Long COVID clinics.

Post-Acute clinics will be led by respiratory consultants and will provide assessment and ongoing care for patients within twelve weeks of infection. The following hospital sites have been nominated as Post-Acute COVID clinics:

- Connolly Hospital Blanchardstown
- Mater University Hospital
- Tallaght University Hospital
- St. James University Hospital
- Cork University Hospital
- University Hospital Galway
- University Hospital Limerick
- Letterkenny University Hospital

Long COVID clinics will be led by respiratory consultants and will provide assessment and ongoing care for patients with prolonged symptoms of COVID-19 more than 12 weeks after initial onset of infection. The following sites have been nominated as Long COVID clinics:

- St James University Hospital
- Cork University Hospital
- University Hospital Galway
- University Hospital Limerick
- Beaumont University Hospital

- St Vincent's University Hospital

Some of these clinics are already operational. They have been established in response to local need and are leveraging existing resources and capacity. The HSE is now working with these sites to expand their resources to ensure they can meet the requirements of the Model of Care and what is required within a local context. It is also working with sites that do not already have access to designated clinics so that these can become operational.

I trust this information is of assistance to you.

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'TJ Dunford', written over a horizontal line.

TJ Dunford

Head of Operations - Primary Care
