5th March 2024

Deputy Michael Collins TD, Dáil Éireann, Leinster House, Kildare Street, Dublin 2.

Re PQ 2713 24: To ask the Minister for Health the amount of money spent on abortion provision in 2023, broken down by category; and if he will make a statement on the matter.

Dear Deputy Collins,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response. Your PQ above has been referred to me for response.

Please see **Appendix 1** below with data provided by the Healthcare Pricing Office (HPO). I draw your attention to all notes attached to the data. The data provided is based on episodes with a principal diagnosis from the following list of diagnosis codes for the year 2022. The overall estimated cost of these episodes is also provided.

- O04 Medical abortion
- O05 Other abortion
- O06 Unspecified abortion
- O07 Failed attempted abortion
- O08 Complications following abortion and ectopic and molar pregnancy

(Please note that codes from category O08 Complications following abortion and ectopic and molar pregnancy are not specific to complications following termination, the codes in this category can also be applied following miscarriage, ectopic pregnancy etc.).

Please also note the following:

- HIPE (Hospital In-Patient Enquiry) is a discharge based dataset. A patient may be
 admitted to and discharged from hospital several times in a given year. Each discharge
 for this patient would be recorded in HIPE. In the absence of a unique patient identifier, it
 is not possible to use HIPE to examine the number of hospital encounters per patient, or
 to estimate the incidence or prevalence of disease or condition.
- The data provided does not include episodes with an additional diagnosis from the specified list of codes. HPO generally do not provide costs based on secondary diagnosis since these may not be the principal reason for admission to hospital.
- Acute admitted discharges (daycase and in-patient) are reported only. HIPE does not collect activity on outpatient or emergency department attendances.
- HIPE cannot be used to distinguish the reason for abortion.

In addition to the costs provided by the HPO in Appendix 1, the National Contracts Office have provided the costs for Community Based Termination of Pregnancy in 2022 which was €5,628,166 and includes PCRS Claim expenditure, TOP medication, National Costs and Local

level costs (My Options freephone helpline, Translation Services etc) Advertising and ICGP training costs (Irish College of General Practitioners).

If you have any queries, please do not hesitate to contact me at sarah.anderson1@hse.ie or tel: 087 9423319.

Yours sincerely

Sarah Anderson
