Dáil Eireann
Leinster House
Dublin 2

Re: PQ ref 22499/24

“To ask the Minister for Health the data which will be reported through the health performance visualisation platform, in tabular form; the relevant metrics and indicators which will be measured and monitored; and the regularity of reporting.”

Dear Deputy Cullinane,

In response to the above query, please find an outline of the data reported through the health performance visualisation platform (HPVP).

The HPVP system allows hospital level users to view hospital level activity, across the domains referenced in the table below, in near real time to support local services.

Additionally, this system provides a summary national view of activity occurring in hospitals.

Domain	Description & Regularity of Reporting	Metrics & Indicators
Emergency Department	The system allows for a view of patient flow and visibility of ED activity at a near real time frequency.	Patient Experience Time Analysis Demand & Activity Breach Analysis ED Trends
Beds	The system allows for the visualization of admissions and discharges at a hospital level. Hospitals can monitor inpatient lengths of stay, discharge times and patient flow. This data is available at a near real	Length of Stay (LoS) Trends & Ward Dynamics Bed Capacity Monitor Inpatient Flow Monitor

	time frequency.	
Outpatients	Visibility of activity relating to outpatient services including booking, attendances and reviews. This data is available at a daily frequency.	Waiting List Bookings Demand & Activity Reviews OPD Productivity
Surgery	Visibility of theatre activity, where available in local site systems, at patient and procedure level. This data is available at a near real time or hourly frequency.	Waiting List Demand & Capacity Elective Schedule Monitor
Medical Imaging	Visibility of medical imaging activity relating to ED, outpatients, and inpatients as well as high level reporting. This data is refreshed multiple times per hour.	Demand & Activity Patients Waiting

At present, there are 21 hospitals live on HPVP. The Outpatient, Beds and ED domains are live in all 21 hospitals, theatre is live in 4 hospitals and not in scope in 16, and the Medical Imaging domain is live in 20 hospitals. An overview of the domains live in each hospital can be found in Appendix 1.

If you feel that the question has not been fully answered or you require any further clarity, please contact me.

Yours sincerely,

Fran Thompson,
Chief Information Officer, Technology and Transformation, HSE.
