Re: PQ 33839/24 – 24/7 primary percutaneous coronary intervention at University Hospital Waterford

“To ask the Minister for Health the status of the business case with the hospital group/health region for 24/7 primary percutaneous coronary intervention at University Hospital Waterford; the estimated cost of the project; and the WTE staffing requirements.”

Dear Deputy Cullinane,

I refer to the above Parliamentary Question seeking an update on the business case regarding the 24/7 primary percutaneous coronary intervention at University Hospital Waterford, which has been referred to the Ireland East Hospital Group for direct response.

I have had this matter examined and am advised that these business cases were received, by the Ireland East Hospital Group, as part of the due diligence report from South South-West Hospital Group.

These business cases are currently under review.

I trust this information is of assistance to you.

Yours sincerely

Roseanne Kileen
Chief Executive Officer, IEHG
