**To ask the Minister for Health if consideration will be given to covering medications like Ozempic under the drug payment scheme for polycystic ovary syndrome; and if he will make a statement on the matter.**  
**-Pádraig O'Sullivan**

Dear Deputy O'Sullivan,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question (Reference 1306/25), which you submitted to the Minister for Health for response.

Medicines are added to the formal Reimbursement List following detailed assessments which include assessment of the clinical evidence, the economic evidence and the budget impact of a decision to reimburse specific indications of a medicine. The Primary Care Reimbursement Service is required to reimburse in line with approved decisions of the HSE and the HSE is required to formally assess each medicines and each specific use of such medicines before reimbursing them.

Ozempic® (semaglutide) is licensed with the Health Products Regulatory Authority (HPRA) in Ireland and indicated as an adjunct to diet and exercise to improve glycaemic control in adults with type 2 diabetes mellitus. Ozempic® was approved by the HSE for addition to the Reimbursement List for the treatment of Diabetes in 2018. Diabetes is one of the Long Term Illness (LTI) conditions for which eligible LTI persons can access their medicines to treat their Diabetes free of charge.

Controls are in place within the Primary Care Reimbursement Service scheme management systems (and are put in place and updated as required) on claiming processes to ensure that only HSE approved indications are reimbursed across a range of medicines. Controls are currently in place for Ozempic® to restrict reimbursement support to the HSE approved indication of Diabetes against a valid prescription.

Semaglutide (Ozempic®) currently does not have an EU marketing authorisation for the treatment of polycystic ovary syndrome (PCOS). Therefore, reimbursement support cannot be made available for an indication which is not licensed and has not gone through a pharmacoeconomic assessment.

Yours sincerely,
